

Gallagher SMB

The app-based solution that simplifies and streamlines security for businesses.

Simplify your security

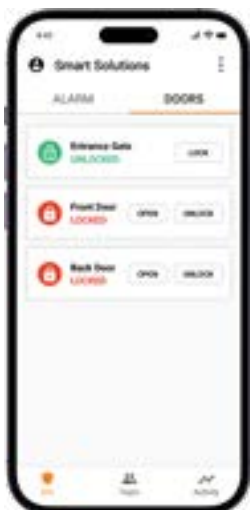

Arm and disarm your alarm

Say goodbye to keys and shared alarm PIN codes. Instead, activate the alarm from anywhere, at any time using your smartphone. Set the Late to Arm notification so you know your business is secure, even when you're not there. Use Bluetooth® to arm your site locally when internet connectivity is unavailable.

Easily manage unlimited users

We've made it simple to add, edit, and remove an unlimited number of users, and manage which parts of the building they can access - even temporary users like contractors and cleaners. You'll see who has activated the alarm or requested access at doors using the **History** log.

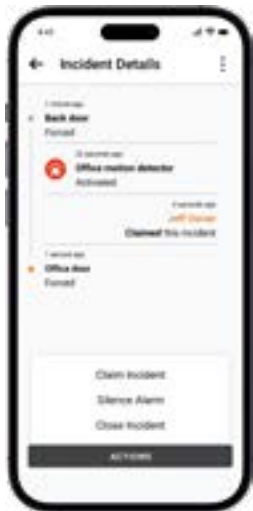

Control your doors

Lock and unlock doors using your smartphone or a Gallagher SMB Key Tag. Configure the doors to be locked 24/7, requiring users to request access at the reader, or set a schedule for when doors should be unlocked.

Manage multiple sites

If you manage multiple sites, you can control the security of them all from one app. Easily switch between different locations of your business using the same app, and assign a user access to multiple sites from a single screen.

Control in your hands, wherever you are

Self-monitor your site

We've made it simple for you to manage security incidents, should your alarm be triggered. You'll get notified as soon as it occurs and receive details about what is happening on your site. You can then decide what to do next – investigate further, silence the alarm, or request a security guard to check on your site (AU & NZ only).

Third-party monitoring

With Gallagher security, you can also opt for your system to be configured to third-party monitoring. If your alarm is triggered, the monitoring company will notify relevant parties in accordance with an agreed action plan. This could be people from your site, your security technician, or a guarding company who will send someone to check your premises.

Cloud-based security

Gallagher SMB is a cloud-based solution, allowing you to manage your security from anywhere, at any time. The system requires no on-site server, or dedicated security staff. It is automatically kept up-to-date with the latest firmware, security updates, and functionality.

**You've worked hard
to build your business.
Let us help protect it.**

Book a free site visit

An authorized SMB Partner can provide a free site visit to identify the needs of your business and prepare a quote. The quote will consist of the hardware, installation fee, and the monthly subscription based on your chosen services.

The SMB Partner will provide information about the subscription options best suited to your business.

To find an authorized SMB Partner in your area, please get in-touch with your local Gallagher representative, who can be found at security.gallagher.com/meet-the-team.
