Gallagher Shared Space Solutions

Managed spaces for modern workplaces

We live in a world of sharing and open communication, with visible impact on the modern workplace. Co-working and open plan shared office spaces are becoming increasingly common to support an entirely new way of working.

The rationale for change is simple: give people the ability to work in different ways on different tasks, with access to the right facilities, and the benefits will flow to your staff and customers.

You don't have to look far to find some great examples of shared space solutions. Fonterra's new activity-based work environment office building in Auckland, and the Camden Triangle LABS co-working space in London.

Part of their success relies on being able to securely manage the space, combining flexibility with security, privacy and efficiency. Forward-thinking access control solutions are essential to truly harness the advantages a shared space and support a dynamic workforce.
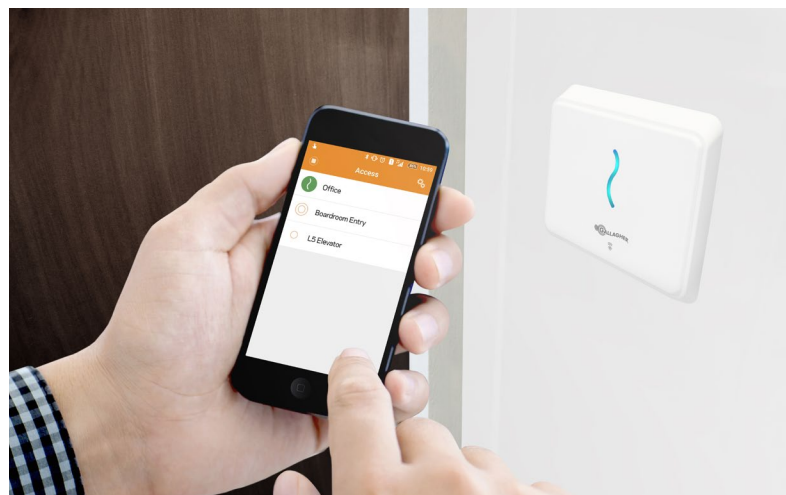

SAFETY AND SECURITY

Flexible working hours and hot desking results in access requests at all times of the day (and night). You need to be able to trust that only approved staff members have access to the car park, storage facilities, and office space.

The Gallagher security system provides 24/7 access control of who is where, and when. **Gallagher's Visitor Management Kiosk** takes care of visitor access, with automatic notification to the host, when the visitor arrives.

Mobility is at the heart of all shared space solutions. **Gallagher's Mobile Connect** app allows staff members to request access at a reader and perform actions like arming or disarming. Remote issuing of credentials to mobile devices also reduces the time and cost associated with managing traditional cards.

Access Control Fundamentals

Who is allowed to enter

Where are they allowed to enter

When are they allowed to enter

RESOURCE UTILIZATION

Having a locker solution is key to a successful activity-based work environment, where nobody has their own desk. **Gallagher's Locker Management Solution** allows you to manage locker access and allocation in a way that suits your people and culture.

Full utilization of your locker resource is made easy, via short term expiry. For example, lockers can be allocated for 2 hours only, providing better availability of your locker resource.

Gallagher's Action on Access manages temporary access on site. This solution allows you to know who's using what and when. Access to rooms, laptops, printing and other resources can be flexibly managed from the one system.

SAFETY AND SECURITY
Provide flexible working hours, while protecting your staff, property and assets

SUSTAINABLE BUSINESS PRACTICE
Reduce energy use, waste and costs

RESOURCE UTILIZATION
Utilize locker, car parking and room assignment from one centralized security platform

SUSTAINABLE BUSINESS PRACTICE

We're all looking for better ways to do business when it comes to the environment. Lighting, air conditioning, ventilation and heating that automatically turns on and off when a space is in use, or with room bookings can reduce energy use and save costs.

St Peter's School saved 14 percent on energy site-wide using Gallagher Command Centre and BACnet.

People's Choice Credit Union is using Follow Me Printing in its modern workplace. Tracking printing costs and metrics of 650 staff through the use of card authentication at the printer has significantly reduced paper waste.

One solution to rule them all

The demand for smart, convenient technology to facilitate great workplace experiences will continue to grow.

Gallagher's highly integrated centralized security platform offers one system to manage all aspects of a safe, secure and sustainable workplace environment.

One system that grows with you, means you're always ready for the next leap in workplace evolution.

SOFTWARE PART NUMBERS			
C201311	Command Centre (includes Action on Access and the Mobile Connect SDK)	C12689	BACnet Interface
		C12738	Active Directory Cardholder Synchronization
C12780	Locker Management Solution	C12625	Booking Interface (Bookable Resources)
C12784	Cardholder REST API	2A8955	Visitor Management
C12782	PaperCut Interface (Follow Me Printing)	2A8681	Visitor Management Self Registration Kiosk
2A8570	Mobile Connect Credential		

Command Centre supports a number video, elevator, and intercom integrations.
