# Becoming an Endorsed Technology Partner

An overview of Gallagher's 6 step process to become an Endorsed Technology Partner.

## 1 Apply

- Complete the Technology Partner Agreement.
- Tell us about the *customer problem* you are solving and value it will deliver to end users.
- Review our *API information* and list which ones you may use.

## 2 Onboard

- Explore our self-service portal, starting with the *Getting Started* section for all you need to begin.
- *Understand our product* via the Command Centre Orientation section
- Set up a *Command Centre environment* via our step-by-step guide.

## 3 Develop

- Start developing your integration!
- Explore our *APIs and SDKs* through our provided documentation.
- Talk to us via the *Support Contacts* section for any type of assistance at any stage.

## 4 License

- Review the *Integration licensing guideline* and create a table with all the API endpoints used.
- We will *create a token* and will supply it to you along with *new demo license.*
- Implement the token and test your integration to make sure it works.

## 5 Demo

- Inform us when you have finished developing your integration.
- *Schedule a demo* with us to review the completed solution.

## 6 Endorse

- Supply us with the necessary content about your integration.
- Once reviewed, we will publish your integration's product page on our *public Gallagher website*.
- Congratulations! You are now a Gallagher Endorsed Technology Partner.
