

# Gallagher Airport Security Solutions

From Curb to Core – Proven Protection for Every Layer of Your Airport

Trusted globally and deployed locally, Gallagher delivers intelligent, scalable security solutions to protect Australia's airports – from perimeter breaches to terminal access.

## Why Airport Security Needs a Curb-to-Core Approach

Airports are dynamic, high-risk environments. From the outer fence line to the terminal gate, every layer must be protected against evolving threats such as intrusion, terrorism, theft, and operational disruption.

Gallagher's integrated security platform delivers curb-to-core protection by combining perimeter intrusion detection, intelligent access control, and centralised alarm management – all within a single, scalable system.

## Gallagher's Integrated Security Ecosystem

### Command Centre

Gallagher's central management platform connects all security layers – perimeter, access control, alarms, and third-party systems – into one intuitive interface.

- Real-time monitoring and control
- Compliance-based access
- Multi-site and multi-tenant support

### Access Control

Beyond doors and gates, Gallagher's intelligent access system manages:

- Staff, contractors, and visitors
- Fatigue and drug testing compliance
- Inductions and licensing
- High-traffic durability with T-Series Readers

### Alarm Management

Instant alerts for intrusions, environmental changes, and system events – all routed through Command Centre for rapid response.

## Perimeter Security – Your First Line of Defence

Gallagher's perimeter solution is trusted at major airports including Sydney, Australia and Christchurch, New Zealand. It combines physical deterrence with intelligent detection:

**Monitored Pulse Fencing:** High-tensile, energised barriers that deter, detect, and delay intruders

**Fence Controllers:** Pinpoint breach zones and trigger automated responses such as lights, cameras, and sirens

**Z-Series Sensors:**

- **Z10 Tension Sensor:** Detects wire tension changes in real time
- **Z20 Disturbance Sensor:** Detects vibrations and movement on fence structures

**GIS Integration:** Map-based monitoring and zone control

### Sydney Airport

Dual detection fence line with Z20 sensors and anti-climb mesh tuned to environmental conditions. Over 10 kilometres of Gallagher fencing deployed.

### Christchurch International Airport

Seamless domestic and international transitions with Gallagher access control across more than 400 doors and airbridges.

### Guangzhou Baiyun International Airport

Scalable Gallagher system supporting growth from 20,000 to 200,000 cardholders, integrated with CCTV, fire systems, and building automation.

## Why Gallagher?

Proven in civil and military airports worldwide

Customisable to site-specific needs

Scalable for regional and metropolitan sites

Backed by global support and research and development

Compliant with aviation regulations

### Let's Secure Your Airport

Whether you're upgrading a regional site or securing a major hub, Gallagher offers tailored solutions, expert support, and proven technology.
