Gallagher PIV
Products

Gallagher’s PIV solution is a physical access control system designed for compliance with the Personal Identity Verification (PIV) requirements of the FIPS 201-2 standard, offering world class security to federal agencies and their contractors.

Complete Solution
A single platform for the management of access control, alarms, and perimeter security, Gallagher’s PIV solution provides:

- A simplified architecture, that enables one of the most efficient, cost effective PIV solutions for physical access control
- Hardware and software that is easy to implement, configure, and maintain
- Secure authentication and encryption between all system components
- Upgradeable device software, future-proofing Gallagher hardware for potential FIPS 201 standard
- Scalable system to incorporate any site’s size requirement
- Quick and simple enrollment, requiring no additional software

Features
The products and software that make up the Gallagher PIV solution deliver a powerful range of features:

- Configurable periodic credential validation
- Optional support for contactless MIFARE Classic®, MIFARE Plus®, 125 kHz and MIFARE DESFire EV1® and MIFARE DESfire EV2® cards when mounted in shared federal / non-federal building entrances
- Single, dual, and triple authentication options
- Rapid PKI authentication for faster door entry
- 128-bit AES encryption between the Controller and access readers
- Authentication of PIV, PIV-I, and CAC credentials
PIV System Architecture

- Highly Secure Access
- Gallagher PIV Command Centre
- Federated Bridge to Certificate / Validation Authority

PIV Products

Gallagher PIV Software

- A Gallagher PIV Command Centre server License enables up to 16 PIV doors on a site, expandable from the 17th door onwards with the per door PIV license
- Configurable validation checks in hours, by factors [1, 2, 3, 4, 6, 8, 12, and 24] of 24 hours
- Gallagher PIV Command Centre provides ongoing OCSP or CRL validation of each PIV card’s status:
  - PIV Authentication Key (PAK) Certificate
  - Card Issuer Signature (CIS) Certificate
  - Card Authentication Key (CAK) certificate

PIV Cardholder Enrollment

- Enroll PIV cardholders natively in Gallagher PIV Command Centre
- No additional licensing required
- Automatic cardholder creation in Command Centre immediately following successful enrollment
- The Morpho USB Enrollment Reader reads PIV cards and confirms that cardholder fingerprints are correct to provide trusted enrollment
- Optional integration to the PIVClass® Registration Engine enrollment client (separate license required)

Gallagher Controller 6000 High Spec - PIV

This controller is fully compliant to the latest FIPS 201-2 standard, and is securely and periodically updated by the Command Centre Server with full details of PIV cardholder certificates and their status. In conjunction with T-Series PIV readers, the controller is responsible for performing all PIV card authentication checks, enforcing the revocation status of PIV card certificates, and performing cardholder specific access control decisions without the need for constant server connectivity.

- Options to support daisy-chain wiring via 2 on board RS-485 ports, or home-run wiring via optional 4H / 8H Modules (4 and 8 x RS485 ports respectively)
- Can be mounted in the Gallagher Cabinet, Gallagher Dual Cabinets, Life Safety Power Cabinet, or on the Gallagher Mounting Plate (all supplied separately)

Gallagher T-Series PIV Readers

Gallagher T-Series PIV Reader’s are thin, contactless/contact card readers that transfer data between PIV smart cards and the Controller 6000. Gallagher T-Series PIV readers can be configured to work with varying PIV smart card data rates and authentication modes.

- Support for real-time and secure certificate based authentication of PIV, PIV-I, CAC, and TWIC credentials
- All readers can be configured to support MIFARE DESFire EV1/EV2, Plus, and Classic credential technologies. Multi Technology readers also provide support for 125 kHz technology
- High grade authentication (256 bit ECC) and encryption (128-bit AES) between the readers and Controller 6000

8H - 4H Reader Modules

Gallagher modules support home run wiring of other control devices, and I/O connectivity for door and equipment monitoring. Gallagher 8H and 4H modules allow HBUS devices to be home run wired back to a secure controller cabinet, removing the risk of one faulty connection taking down all downstream devices (as on a daisy-chained run). Each HBUS port can also support multiple HBUS devices. Gallagher 8H and 4H modules monitor and report the state of balanced inputs, and enforce decisions to switch output relays, if required.

Gallagher Cabinets

Gallagher supplies secure enclosures for the Gallagher C6000 Controllers, and HBUS devices. Gallagher Cabinets are available in several form factors:
- Keyed lock for cabinet access
- Reversible cover
- Cable entry points on all cabinet edges
- Optical tamper protection.

LSP Cabinets

Gallagher provides LSP UL compliant cabinets in high grade steel locking enclosures. Each cabinet comes pre-installed with power supply and distribution modules, and is available in two variants:
- LSP E2 Cabinet, 6A PSU, 8-Channel Distribution board, and a 75W Power supply board
- LSP E4 Cabinet, 12A PSU, 2 x 8-Channel Distribution board, and a 150W Power supply board

Morpho USB Enrollment Reader

A key part of the enrollment system, the MorphoSmart 1300 Series device matches presented fingerprints against those stored on a PIV credential.
- Contact insertion and biometric reader
- Seamlessly integrated with PIV Command Centre
- Supports direct USB Connectivity
- FIPS 201 and MINEX compliant Feature Extractor and Matcher onboard.

Veridt Stealth Bio Reader

Veridt’s Stealth Bio Reader integrates seamlessly with Gallagher’s PIV system.
- Supports up to triple factor authentication: PIV card, PIN and Biometric
- Scheduled operation modes, aligning authentication with security threats
- Compliant with NIST SP-800 specification for authentication to access ‘limited’ security areas
- Optional Heavy Weather Enclosure available
